

# HopeChain

## Abstract

The Blockchain-Based Charity Donation Platform is designed to revolutionize charitable contributions by leveraging blockchain technology to ensure transparency, security, and efficiency. The platform allows users to create and manage charity campaigns, providing essential details such as campaign name, description, and donation goals. Users can view all ongoing campaigns and track donations in real-time, ensuring full transparency of all transactions. By utilizing the decentralized nature of blockchain, the platform aims to build trust among donors and recipients, fostering a more reliable and impactful charitable ecosystem.
